

Male Feeder

 **PLASSON**[®]
Livestock

Global Presence - Local Commitment

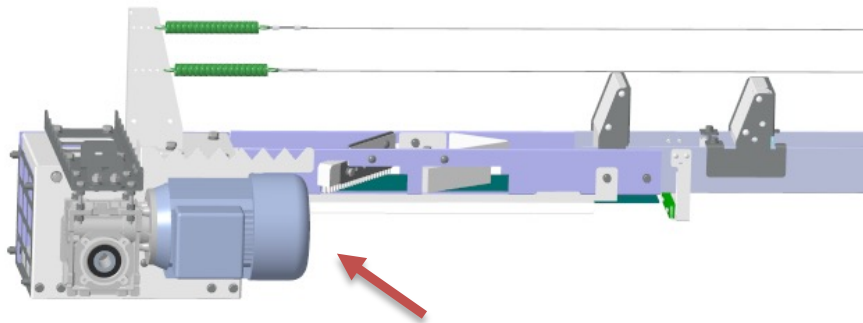

Male Feeder - Layout

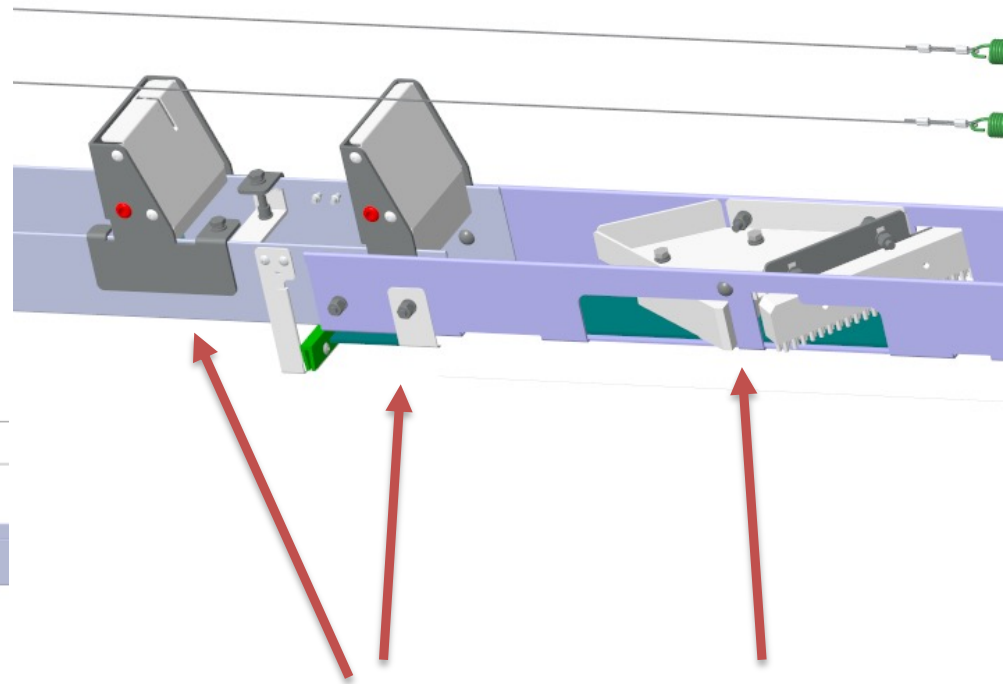

Male Feeder - Advantages

- Food presentation is built into the system
- The food is perfectly and evenly distributed for uniform eating of the birds
- Modular, can be any length up to 270 feet (82 cm)
- The food is delivered on the belt, not rolling or breaking or crushing as it is with chain systems
- Very easy and quick installation
- The system can be installed next to the wall or in the center of the house
- The system is easy and simple to maintain
- The strap is very easy to use, light, very easy connecting
- Very safe to use for workers (no chain that can harm workers and birds)
- Modular, can be any length up to 270 feet

Male Feeder - Layout

0.37 kw single phase drive unit

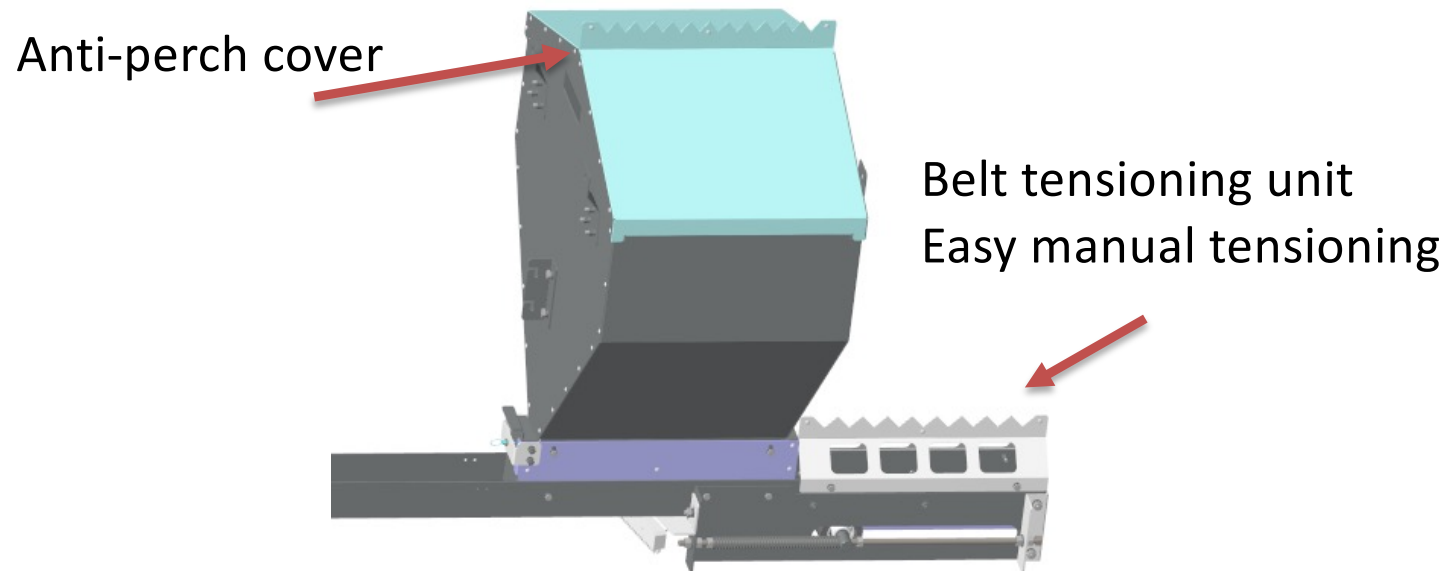

Line end sensors

Belt cleaner

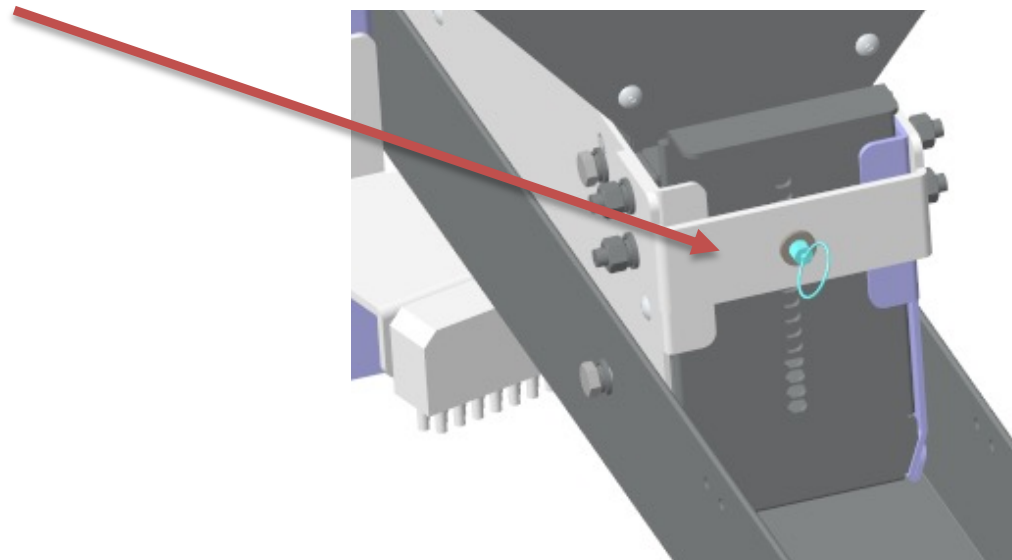

Male Feeder - Hopper

Hopper of any size and any amount of feed
From 60 pounds to 300 pounds

Male Feeder – Slide Gate

A very accurate and durable slide gate
the system can deliver from a very small portions (almost zero)
and up to 1.5 pounds per pot

Male Feeder – Belt

- Reinforced belt resistant to mechanical damage (for bird pecking)
- Belt with 3 layers, 2 layers of PVC and a layer of fabric for durability of many years
- Installing the strap is very easy without the need for tensioners or specialized tools.

Thank You!
